

## PNEUMATIC CRIMP TOOLS For 12 - 16 - 18 - 20 contact size

The pneumatic tools are well known for their unequalled reputation for trouble-free, dependable service, cost saving and adaptability both in military and industrial programs. Whether upper, middle or lower range, the power tools fulfill the same precise crimp requirements as the hand models. They use the same indenter configuration, the same gaging dimensions and selector settings.

No additional operator training is necessary. The compact size and light weight of these tools allows them to be used easily as hand tools, as well as high production bench tools. The hand trigger is designed for equal ease of use by right or left handed operators.

Bench mounted, the optional foot valve allows hands-free operation. The bench mount will allow the tool to be secured at virtually any angle for individual comfort, thereby minimizing operator fatigue.

The foot valve, when installed in-line with an air supply, makes a portable system which is adaptable to any work bench. Air supply requirements are 5.5 to 8.0 atmospheres clean dry air. The system uses standard air fitting readily available in most shops.
