

PNEUMATIC CRIMP TOOLS For 12 - 16 - 18 - 20 contact size

Our pneumatic crimping tools are well known for their unequalled reputation for trouble-free, cost saving and adaptability both in military and industrial programs. Whether upper, middle or lower range, the power tools fulfill the same precise crimping requirements as the manual versions.

No additional operator training is necessary. The compact size and light weight of these tools allows them to be used easily as hand tools, as well as high production bench tools. The hand trigger is designed for equal ease of use by right or left handed operators.

Bench mounted, the optional foot valve allows hands-free operation.

The bench mount allows the tool to be secured at virtually any angle at the operator's will. The foot valve, when installed in-line with an air supply, makes a portable system which is adaptable to any work bench.

Air supply requirements are 5.5 to 8.0 atmospheres clean dry air.

The system uses standard air fitting readily available in stores.
